Theme – AI TO IMPACT

PROBLEM ADDRESSED :

40+ Million Retail and Wholesale shop owners in India rely heavily on manual or semi-digital billing methods that are **time-consuming, error-prone, and inefficient**.

Handwritten bills lack professionalism, maintaining sales records is difficult, generating proper GST-compliant bills is impossible and existing digital solutions are often **too expensive or complex** for small businesses.

Who faces these Problems ?

Small and
medium retail
store owners

Kirana and
grocery
shopkeepers

Pharmacy
and medical
store owners

Dairy and milk
product
retailers

Stationery
and general
stores

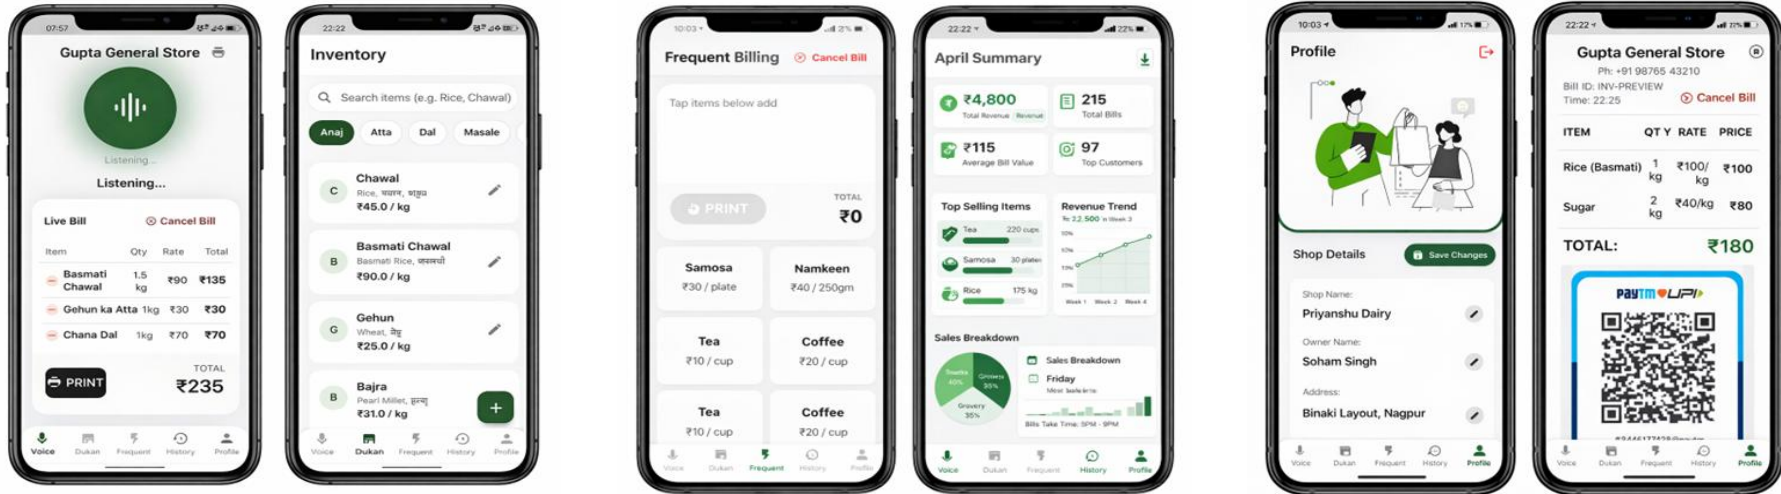

“Small shop owners need a fast and simple billing and shop maintaining system, not a complex computer software.”

PROPOSED SOLUTION

Vyamit AI = Vyapaar + Mitra AI

-Empowering 40+ Million Indian Shop Owners with AI-Driven Voice Commerce

“Instead of writing or typing, the shopkeeper only speaks. Our app listens, calculates, and prepares the bill automatically. This makes billing and keeping records fast, simple, and stress-free.”

KEY FEATURES :

Vyamit AI

Multi-Language Voice Support:

Hindi ,English ,Marathi

Automatic Bill Framing:

Just speak naturally, and the AI automatically create bills

Smart Rate Calculation:

Need to say the quantity of item;
AI calculates the total instantly

Smart Dialect Support:

Understands Dedh Kilo or Ek Paav

Users can Ask Questions:

About Shop Revenue ,
Inventory,

Flexible Printing Options:

Can u any Thermal and
Inkjet Printersse

Virtual Billing Option :

User can send the virtual bill
through whatsapp or sms

Cloud Sync & History:

Stores Shop Details and ,
Revenue ,Inventory,ledger

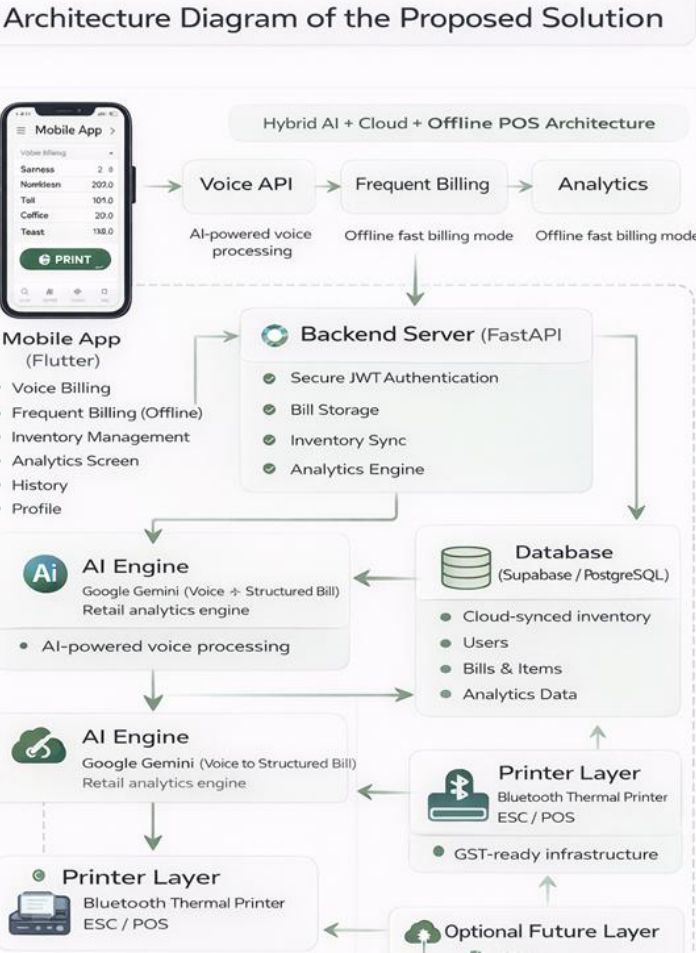

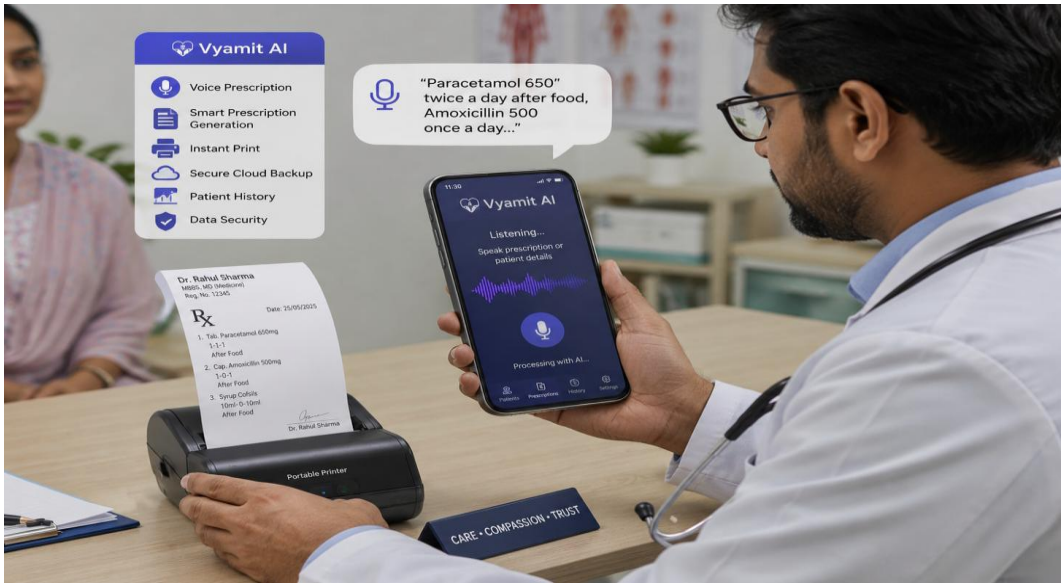

Maintain Records with voice

User Can maintain sales
records and customers

Silent Application – Digital Prescription Mode

- Illegible handwritten prescriptions - Patient risk
- Enables doctors to generate clear, structured prescriptions quickly
- Ensures accurate dosage, safer treatment, improved patient trust.
- Patients can understand Prescriptions

Technologies Used

Frontend (Mobile Application)

Built using **Flutter (Dart)** to deliver a smooth, high-performance user experience, optimized for **budget Android devices** commonly used in small retail shops.

Backend & Cloud Infrastructure

Powered by a **FastAPI (Python)** backend with **PostgreSQL (Supabase)** , **Pinecone** for scalable, reliable data storage. Deployed on **cloud infrastructure (AWS/ Render)** with secure, high-availability server handling.

Authentication & Security

Implements **OTP-based authentication** using **FAST2SMS services** for reliable OTP delivery. Uses **Nginx** , **JWT tokens** to manage secure user sessions

Voice Processing Pipeline (NLP)

Uses **Speech-to-Text Engine** to capture spoken commands and **Neural Text-to-Speech** for instant audio feedback, enabling hands-free billing.

Artificial Intelligence (Custom LLM) :

Integrated with **AI Model** , **Langraph** ,**RAG** ,fine-tuned to understand **Indian retail context, local dialects** for accurate bill generation.

Hardware Integration & IoT

Supports **ESC/POS Bluetooth protocols** for instant thermal printing , inkjet and other printer types, enabling seamless hardware connectivity.

FEASIBILITY AND VIABILITY

Market Competition :

- ✓ Manages customer data
- ✓ Tracks outstanding balances

- ✗ Only basic ledger
- ✗ No voice bill option
- ✗ No printer support

- ✓ Supports billing with hardware
- ✓ Designed for fast checkout

- ✗ Expensive Product (Rs 5200)
- ✗ Only supports their printers
- ✗ Requires manual calculations

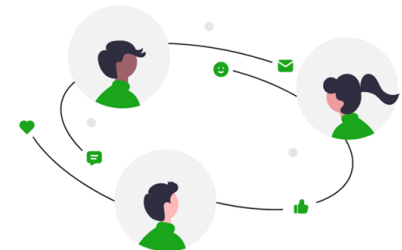

- ✓ Fast billing interface
- ✓ Good for Proper Quantity Products

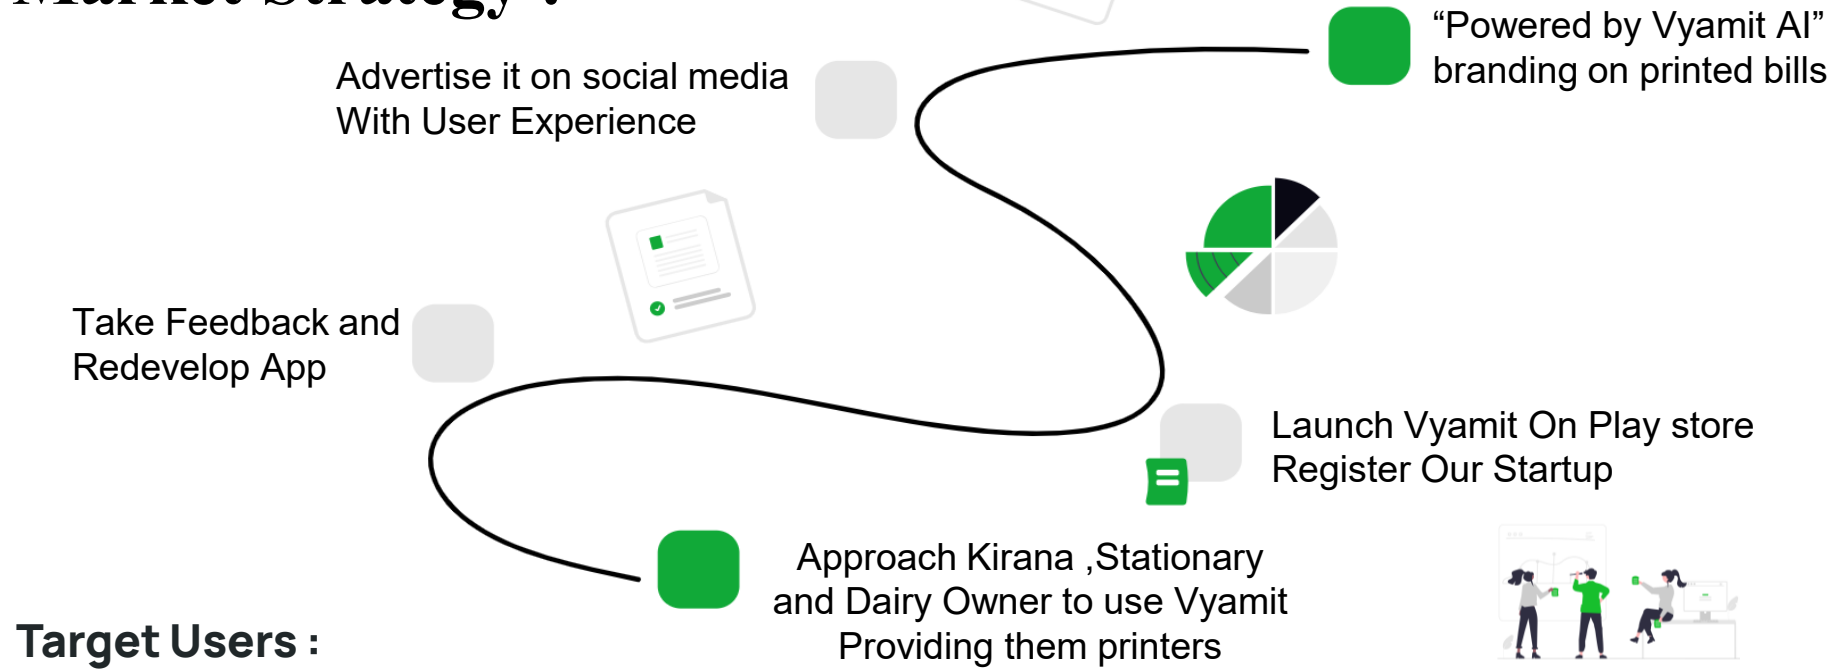

- ✗ cannot work for random items
- ✗ Inventory features are basic
- ✗ Expensive Printers (Rs 4400)

Why Users will Love Vyamit_AI Platform :

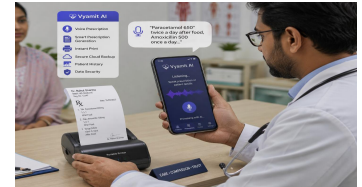

- Zero Typing : Works 100% on voice commands
- Local Language : Understands language perfectly
- For Everyone : Even an uneducated shopkeeper can use it easily.
- Connect with any printer Including Thermal Printer of Rs 580

Market Strategy :

Target Users :

App Maintenance & Operational Cost :

Cloud Infrastructure

AWS hosting fees,
Server scaling cost

Database Services

Supabase database
hosting, Vector
storage fees

Authentication Services

OTP SMS charges,
FAST2SMS credits

AI & Processing

Gemini API usage, AI
processing cost

Revenue Model :

In-App Advertising

- Targeted business ads
- Featured product listings
- Distributor promotions

B2B Wholesale Platform

- Wholesale product showcasing
- Commission per order
- Premium supplier listings

Subscription Model

- Freemium usage limit
- Unlimited billing access

FUTURE ROADMAP :

Strategic AI Transition

Currently using Gemini AI. We will launch our own custom AI model after reaching 1200+ users to cut costs and increase speed

Smarter AI with Data

We will use real billing data to retrain our AI, making it understand local items better every single day

Pan-India Reach

Expanding voice support to 10+ Indian languages to help shopkeepers in every corner of the country

Offline Mode

Building On-Device Features so shopkeepers can create bills by voice even without the internet

Digital Prescription Mode

Vyamit eliminates risks from illegible prescriptions by generating clear, structured digital prescriptions.

B2B Direct Commerce Engine (Phase 2 Growth)

After getting a good Userbase we will showcase best deals on the products that user interested and start B2B business

“We are building not just an app, but a trusted digital billing and business maintaining platform for small Indian businesses.”
